VISI

N

OPERATIONAL

We don't only design, develop, invest and realize a renewable energy system, but we also keep it operational for 30 years or longer.

We keep it operational in organizational, financial and technical sense all under one roof. We daily monitor the installations and follow technological developments allowing the system to be even more energy efficient for even more comfortable living.

Result: A total reliability and durability of the system installed

NEED

We address some of the basic human needs for comfortable living. There we push the thresholds and set standards that other follow.

At our company we are very good at understanding the needs of different stakeholders in process of creating living environments. Whether you are a developer or a future home owner, rest assured that our system understands and meets your needs. Affordable comfort at home, powered by a renewable sources is a necessity.

Result: clearly defined and satisfied needs of our clients and partner

Vision renewable solutions

V

ISION

VIABLE

Every day renewable energy sources provide enough energy to satisfy the needs of the entire world.

Our idea is to make use of this energy viable and we intend to do it by completing as many projects as possible that use the renewable energy sources. Through an optimal mix of geothermal and solar energy use we make sure that our solutions are moving us closer to our goals.

Result: Comfortable living at affordable prices with as little dependency on fossil fuels as possible

I

VISION

INTEGRATED

Our solutions are integrating technical and financial capabilities. Through this integration we share knowledge, innovation, initiatives for the growing market of energy efficient buildings.

We translate your ambition with an optimal mixture of technology, finance and organization to offer quality to our clients over 30 year period of use.

Result: An integrated care free concept

SYNERGY

We aim to offer synergy of cost efficiency and sustainability to our clients. Through share of knowledge and strategic partnerships we act in synergy to fulfill our vision.

Through cooperation with universities, equipment producers and other suppliers we are always at the tip of the progress in use of renewables for housing industry. Through clear and transparent cooperation with our partners, our synergy is effective and efficient.

Result: Care, Share, Dare, No Air

VISION

INNOVATION

Today we develop ideas for tomorrow and beyond. When running a long term business, it is essential to keep innovating.

Technical, financial and organizational innovations are there to ensure our leading position in 2020 and beyond. Among other things, since 2009, company has developed "Smart Grid Heat" and "Heat-Matcher" as technological solutions. Company has developed its own investment regional sustainability funds without the banks but under close watch of the Dutch supervisory bodies for financial markets. Organizational innovations allowed us to develop various management models for partnerships.

Result: Innovation has become a way of life and operation for the group
